

Fast Facts about Weather Dek2 Fast-Fix

Speed, weather protection, the elimination of squeaky floors and now acoustic performance are all tangible benefits to housebuilders using **Weather Dek2 Fast-Fix** flooring systems.

Two years after introducing **Weather Dek2 Fast-Fix** we are continuing the innovation and product development which has made Puhos flooring synonymous with **quality, performance and cost efficiency**.

New BRE tests confirm compliance with the latest stringent acoustic standards required in Part E of Building Regs. This makes **Weather Dek2 Fast-Fix** the only fully BBA approved flooring system to combine high quality weather protected floor panels with engineered beams in a total flooring solution which meets all the latest performance criteria. **This includes up to 2dB improvement in acoustic value without added insulation or expensive ceiling systems.**

Not surprisingly, the industry knows a good thing when it sees it!

Weather Dek2 Fast-Fix has achieved notable market penetration in the last two years and now accounts for some **20% of the total new build market for wood floors.**

True to form, **Puhos** continues to innovate: improving performance; gaining recognised third party certification; supporting this with service second to none; above all, focusing on a quality end product which exceeds the expectations of both housebuilders and home buyers alike.

So there are many good reasons to ensure you specify and use **Weather Dek2 Fast-Fix** from **Puhos** and its nationwide distributor partners. In addition, we are always keen to investigate any special flooring requirements you may have or problems you wish to overcome. **Always make Puhos Board UK your first call for flooring expertise and fast solutions in a demanding world.**
